

Using a monthly flea preventative can keep you from getting a flea infestation in your home.

However, if you are already have an infestation in your home, here are a few tips that will help.

1. Vacuum your whole house! Especially where your pet sleeps or spends a lot of time. Also, move and clean under all furniture. Empty the vacuum outside or dispose of the bag outside.
2. Use a premise spray such as Mycodex Environmental Control or Knockout from Virbac. (There is no need to leave your home for hours while it works). Lightly spray area again, getting under furniture and where your pet sleeps. Let dry before allowing children or pets in the room. Be sure to follow all label directions on any premise spray you use.
3. Be sure to treat both your indoor and outdoor pets with a Monthly flea product such as Comfortis, Frontline or Certifect.
